

Conjunct of VA and DA rendered properly

Conjunct of BA and DA not rendered properly

Zoomed up view to demonstrate our problem with BA-consonant conjuncts

Conjuncts of BA and all other consonants should have similar behavior as conjuncts of VA and respective consonants

This is the problem we want you to solve

What We “Wish”

v + d = व + द = व्
b + d = ब + द = ब्

Edited by hand to demonstrate what behavior we need. The “scar” is colored red to show that is what I mean by scar.
